Taylor)

Maybe it's just a feeling, everytime we meet

But you hit me right out of the blue, from all those
people

out on the streets.

And if one time you told me that you loved me, heaven
knows

I would feel that I could ski right off the bridge
of your pretty nose.

This could be my destination

This could be my destination

And if one time you told me that you cared for me

You would, renovate my soul

This could be my destination

This could be my destination

Play some guitar now ...

You could be my ...

You might be my ...

You must be my ...

Final destination

This could be my destination

You must be my destination

Know what I mean ...

In the day time, in the night time

In the Summertime, in the wintertime

About any time, for all time

Say you'll be mine

Say you'll be mine

Say you'll be mine

Till the end of time.
