Facing, drifting which way should it be
Down under, beneath the soul is lost
Now absent minded well, I don't, well, I don't like it
So show me the new way to my soul

Embracing onto the life that was given to you
And gripping tasted much time that you've wasted
And death will haunt you will it lead you
To fighting off the will to find my soul again

Now it's time to take a good look at you
And think about this second chance
That you've been given at life so don't abuse the time
'Cause if you fuck up you will lose your soul again

Facing, drifting which way should it be
Down under, beneath the soul is lost
Now absent minded well, I don't, well, I don't like it
So show me the new way to my soul

I found my lost soul but it's all broken down
I found my lost soul but it's all broken down
I found my lost soul but it's all broken down
I found my lost soul but it's all broken down

Embracing onto the life that was given to you
And gripping tasted much time that you've wasted
And death will haunt you will it lead you
To fighting off the will to find my soul again

Now it's time to take a good look at you
And think about this second chance
That you've been given at life so don't abuse the time
'Cause if you fuck up you will lose your soul again

I found my lost soul but it's all broken down
I found my lost soul but it's all broken down
I found my lost soul but it's all broken down
I found my lost soul but it's all broken down
