Ellis Hall and Jud Friedman
So many years, so confused
Wondering, where I'm goin' to
Roads with no signs, dreams left behind

Nothing made sense without you
Now that you're here, I understand
Now it's clear who I am
It's like coming home, a child, but full grown
The whole world familiar yet new

I have been searching for such a long, long time
I have been missing something in my life
Lord, I was lost, 'til you pulled me through
I found myself, I found myself in you

Never belonged or wanted to
But now, I belong forever to you
You've made me see, all I can be
You put your faith in me

I have been searching for such a long, long time
I have been missing something in my life
Lord, I was lost, 'til you pulled me through
I found myself, I found myself in you

Never belonged, or wanted to
But now, I belong forever to you
You've made me see, all I can be
You put your faith in me

Shown me
You know me better than I

Have been searching for such a long, long time
I have been missing something in my life
Lord, I was lost, 'til you pulled me through yeah
I found myself, I found myself in you
I found myself in you, I found myself in you
