(Thompson/Foreman)

All your hopes and ideas innermost fears

Come out for all the world to see

But don't you dare bolt back in your hole

The fact of the matter as you sit and gloat

The ice banner shall give a demonstration

Of her infuriation go !!!!!!!!!!!!!!!

Good evening I'm a cloud looking down upon my crazy crowd

Helpless in not knowing just what I should or what I should not do

But focus it's never too late to notice

Pipedream are you working up a steam from the morning dew

Pipedream I bequest taking impossibilities

To the final test are you

If I only knew

Pipedream you've been oh so meek

In walking up a dream from a deep deep sleep

Pipedream

Pipedream if I only knew

I see industrial relations taking a dive into a bottomless pit

Where only salvation survives and oh how it thrives

I see lifestyle needing a change enough to make

PG Wodehouse turn in his grave

All the scientists chuckled away and then shuffled all day

Pipedream are you working up a steam from the morning day

Taking impossibilities to the final test are you
