I can go where I wanna
Be who I wanna be now
I can sleep under water
Never worry, what I'm gonna dream now

Yeah, the times come and gone
And I know where I'm from I can be so
It's hasta manyana
You're on your own banana skin, feel now

Yeah, I've been hung in a bad place
Had no sun on my face
I've been hung in a bad place
For too long

I can say what I wanna
Feel how I wanna feel now
I can squeeze all the hours
I choose to devour with ease now

I can sing to the trees
Tarzan on harmonies for free, yeah
You've been blocked and you're storming
Nature is calling for me, you got me

Yeah, I've been hung in a bad place
Had no sun on my face
I've been hung in a bad place
For too long

Yeah, I've been hung in a bad place
Had no sun on my face
I've been hung in a bad place
For too long, for too long, for too long
For too long, for too long, for too long
For too long, for too long, for too long
