"Sadistic Experiments"

Government has influenced and orchestrated
abduction of civilians.
For use as subject in secretive experiments forcibly
exposing them to deadly pathogens.
Survival was never the outcome expected.
Survival was never expected.
Tests are conducted to observe a fatality of their
infection.
Created with only harmful intent of slowly killing it's
host and increasing the potential to spread.
You are chosen the first casualty to demonstrate it's
bodily affliction.
Suspended from appendages, your spinal cord is
punctured.
The virulent injected, in an agonizing procedure.
Monitored at distance, initial ailments run it's course.
Veins protrude and begin to rupture.
Flesh separates, hanging from weakened limbs.
Boyles inflate with plasma, spontaneously burning
through the skin.
YOU BODY IS DISFIGURED.
This experience continues to worsen as infection full
takes over.
Subjective to their sadistic experiments, you are
transformed into a sight a abomination.
