Dragged after the chariots In chains Of secret ways of  
fate Through desert sands  
And burning waste I'll beat my chains into a sword Then  
from the shadow  
I shall come forth With light and flame Under mist of  
stars Rip the night Reveal myself  
No longer hid in darkened spells Rip the veil Reveal my  
crown No longer hid in darkened Shroud  
This could be the kingdom of heaven This could be the  
kingdom of you  
This could the kingdom of heaven Come true  
Dragged after the chariots In chains Of secret ways of  
fate Through desert sands  
And burning waste I'll beat my chains into a sword  
Then from the shadow With light and flame Under mist  
of stars  
Rip the night Reveal myself No longer hid in darkened  
spells Rip the veil Reveal my crown  
No longer hid in darkened Shroud  
his could be the kingdom of heaven This could be the  
kingdom of you  
This could the kingdom of heaven Come true

Power of the secret fire Exaltation Morningstar rising  
Then from the shadow  
I shall come forth With light and flame Under a crown  
of stars  
This could be the kingdom of heaven  
This could be the kingdom of you  
This could be the kingdom of heaven  
Come true
