Rejoice all friends of Armageddon  
For the time of the eternal eclipse has come  
I now await the genocide mass  
As it comes, all in its way is bound for death  
All of earth will be shattered by it  
And all lives taken as a raging nuclear fire  
Caresses and melts away the very ground  
We stand on hell on earth  
Will be reality even though just for a few brief moments  
It will seem like a thousand years  
Fire eradicating all and annihilating everything  
This is my dream this is what keeps me alive  
The holy thought of witnessing the realization  
Of this my most beloved fantasy  
Is the only thing that sustains me  
It is the very essence of my being

Hail Armageddon  
Hail the new age  
Hail the apocalypse

I await you night after night  
I wish for nothing more for you to whisk all life away  
and leave the world in ruins  
I will give my life for you  
I will fight for your arrival although it is certain  
Come now and cleanse the earth of naive and secular  
beings  
Let mankind's thousands of years of struggle be but a  
waste  
And take them away with relentless fury  
Grant me the dream of witnessing earth's demise  
And I will gladly go with it  
Down into the empty space beneath
