"Critical Error"

Visit "[Critical Error](#)" on MotoLyrics.com

Life is fragile and filled with pain
So much at stake - All could end
Much wrong doing by the human race
With all the signs - you'd think we would change

Angered by our out of control lives
Suicide is what we're begging for
Lied to by the ones who control
Destroy all the power and greed

No more chances - our time is short
It is too late - the damage is done

Angered by our destructive ways
Humans - the critical error

One slip and it all could end now
Humans don't care and that is going to kill us
Next thing the world 's on fire
And it's all gone because we did not seem to care

Life - it's so expectable - we know it's delicate
But we just keep crushing our own resources
Why? You'd think we would correct the problems
Of this life - but we don't want to
We would rather just fucking die
