"Domain Of The Eternal Paradox"

Visit "[Domain Of The Eternal Paradox](#)" on MotoLyrics.com

Through feindish experimentation to create an eternal
domain a technological civilization finds a way to
escape its demise

Convinced by the science they've discovered they
believe to have control of their ends

Regardless of possible outcomes naïve to inevitable
effects

Nature's coding will never be conquered

Trapped inside their vision

Harvested within the shadows of life

Conceived beneath the senses of man submerged in
darkness it slowly comes into form

Its means on existence devourment of life

Self

Conceived Torment Conscious Dominion
