

Odious Mortem

"Future Of Nothing"

Visit "[Future Of Nothing](#)" on MotoLyrics.com

Humans are programmed to ruin each other
A vicious circle that will come to an end
Because of the hatred for each other
Emptiness now fills this ruined world
Because of complete ignorance
This life will cease to exist
Humans wasting all their time
This life is far from being fine
Our race-soon to face extinction
The end-so close
Every day is such a struggle
Why all the stress
World on fire
The path of destruction
Has shown it's face
The world is burnt
There is nothing left
Earth has nothing but ashes remains
What is the cause of this
Ignorant minded humans
Born into life under ignorance
This is so god-damned stupid, it makes no sense
Living this life full of lies
I can't wait until I die
The wall of stress is crushing us now
There is no escape
Knowing life will be no more
See the life of this world die
Time to face the end
A split second of pain
There is no remorse
Death
Future of nothing
Because it's all been destroyed
This way of life
Involves too much stress
