Pain!

Hell is what we feel - pain - a part of life
Shocked by what we see
Gone from what is real

Shocking pain infused into my brain
Instability inside is crushing me
Not knowing anymore who I am
The trauma suffered feels just like hell

Pain!

Why am I suffering?
Constant hell
Stressed out life

All we hate - all we fear comes alive
Can't see anymore that life is fine
All the time we spend in misery
Our brains are ruined by the agony
