

Odium "Swallow"

Visit "[Swallow](#)" on MotoLyrics.com

Wash away the sins from me
Take away the fears
Fill the cup with the blood I bleed
Followed by some tears

I lay my soul into your hands
Won't you keep it warm
A grim reflection of you and me
Please, do me no harm

A hammer to the forehead
It makes me think of you
A hammer to my forehead

Now what am I gonna do?

Swallow the bitter pill
All the lies they make me ill
All my nightmares are fulfilled
Swallow the bitter pill (2x)

Why can't you explain?
I do not understand
your anger crushes my face
the blood is on your hands
