I'm asking you  
The reason of my life  
The reason of my fear  
I feel end is so near

Watching your sky  
While people cry and die  
We're victims of the pain  
War and death, blood again

Oh get me out of here  
Please take my hands and my fear

Falling star  
We will no cry tonight

Falling star  
Will take my gaze to light

I am along  
I cannot understand  
What's right and what is wrong  
When the time will be end

Oh get me out of here  
Please take my hands and my fear

Falling star  
We will no cry tonight  
Falling star will take my gaze to light
