She's not okay, and she keeps telling me
And I don't know what to say
When you can't sleep and you can't eat
It's just too hard to lead the way

Up all night crying, this day won't go away, just go
away
I light my cigarette and open up my phone and say

I know what it's like to be afraid
I said I know, I feel it every goddamn day
And I know what it's like to be angry all the time
I know what it's like to always be the last in line

At least I know
