Look what you have gone and done

You fool

The best was yet to come

What a childish game to play

You had it all

And threw it all away

You were not the first my love

Don't kid yourself

You sure won't be the last

You have just yourself to blame

A fools a fool

By any other name

You'll never know, you'll never know

You'll never know, you'll never know

You'll never know

How close we came
