I can't say I feel a little bit bad
You hurt yourself the other day
Atleast that's what I hear
And I'm still awake from the night before
You sent me a letter stating
You wanna start a war with me
Bitch you should

Your face has changed (ooh ooh)
I guess that's the way things work in the world
And the best part is on it's way

If anyone says they feel a little bit bad
They're just being nice to you
It's the only time you're listening
I can't say I feel anything at all
I'm just being nice to you
It's the only time you're listening
Your face has changed
I guess that's the way things work in the world
And the best part is on it's way

I can't say
