

Oh Laura

"The City"

Visit "[The City](#)" on MotoLyrics.com

We all live in the city
The city that we love to hate
The city that's fucking dirty
In every single fucking way

But you'll still find a smile
Wherever you find me
I'm wondering if this place is right
For me

We're all getting tired of this big city
The city I can never understand
Yeah yeah
I can't go back home
There's no such thing as home for me
Right now

The city will take you anyway it can
5 million people under the man

We all live in a city
A city that we love to hate
A city that's fucking dirty
In every single fucking way

The city will take you anyway it can
5 million people under the man
They've got us in the palms of their hands
