Now Pluto girls are neat but you know they'll
Eat you up alive
Although they're nice to know when it's a thousand
below
It isn't easy to survive
And Neptune girls are great for dancing
With a dozen arms and legs
They really hold you tight and they can boogie all night
But it's so hard to kiss three heads

[Chorus]

I wish they all could be California girls
I wish they all could be California girls

Now Martian girls are really pretty
With complexions bright and green
But nothing can surpass an andromeda lass
I think their pointed heads are keen
And Saturn girls are really funny they can
Make you laugh to death
With methane clouds alas combined with hydrogen gas
Why it's a chore to take a breath

[Chorus]

I wish they all could be California girls
I wish they all could be California girls

[guitar solo]

[Chorus]

Girls -girls- girls- girls - I need... (etc. etc.)

[Chorus III]- Calif--ornia Calif--ornia Calif-- ornia
Calif--ornia Calif--ornia Calif-- ornia
