"All Over The World"

Visit "[All Over The World](#)" on MotoLyrics.com

Now, why you move so damn slow, pick it up
You gotta let it go
So are you in or out, now what's your game
You gotta let me know

'Cause time is running out in here
And life starts wearing me out
And I would take you anywhere
You got one second to go

Just follow me all over the world
And you won't even notice what hit you babe
Just follow me all over the world
And life will never treat you the same again

Cause a jump like this, will mess you up
But I can't do less than this
Just follow me all over the world
And life won't treat you so bad

You gotta let those flat beats move your feet
Baby just count on me
Just let your head go insane, lose your name
Be what you're made to be

Cause time is running out in here
You got one second to go

Just follow me all over the world
And you won't even notice what hit you babe
Follow me all over the world
And life will never treat you the same again

'Cause a jump like this, will mess you up
But I can't do less than this
Just follow me all over the world

And life won't treat you so bad

Just follow me all over the world

And you don't know me yet, but I don't care

And you don't know me yet, but I don't care

I wanna make this tonight

Let's do this alright

Next flight is your flight

You got it girl right

Can't stop this, tonight

Don't be so uptight

I want you to follow me all over the world

And you won't even notice what hit you babe

Follow me all over the world

And life will never treat you the same again

Follow me all over the world

And you won't even notice what hit you babe

Follow me all over the world

And life will never treat you the same again

'Cause a jump like this, will mess you up

But I can't do less than this

Just follow me all over the world

And life won't treat you so bad
