We take in the city lights  
Every saturday night  
We catch a movie and see the sights  
To get the feeling right  
She drinks malt whiskey all night long  
All lined along the bar  
There's no doubt she likes it strong  
She knocks them back like a star

We search the city for a club or two  
Every saturday night  
She's a mover when she hits the floor  
Oh what a wonderful sight  
The bouncers and the dj's cry for more  
When she gets upto sing  
Sinfull eyes, and mournfull sighs  
And flashing diamond ring

Chorus

I just love and they just love to see those ebony eyes  
I just love and they just love as she pulls in the guys  
I just love and they just love to see those ebony eyes  
I just love and they just love as she lights up the skies

When the night is over and the day is done  
On another saturday night  
We take the freeway homeward run  
She turns out what a sight  
Those empty eyes that I love so  
I'll join the list of fools  
She follows me wherever I go  
She likes to break the rules
