

## Crucified "Bloodline"

Visit "[Bloodline](#)" on [MotoLyrics.com](http://MotoLyrics.com)

Drag down - feel this fatal heart beat  
So deep - like the pound, pound, pounding industry  
Cry out - I heard you slowly waking  
Drowned out and slowly making back the writhing line

They cut the bloodline in the center  
And injected this hated strain  
They cut the bloodline, they left it wanting  
Feeding on this youth's remains

And she goes

Give me the life - give me your love  
Give me your innocence - give me the blood  
Give me your life - give me your love  
Give me your innocence - give me the blood  
Give me the blood  
Give me the blood

Fall out - that they left here from the time before  
Fall down - this throb, throb, throbbing core  
Reach out - but the words are so empty  
Fold in and the edges fade to black

They cut the bloodline in the center  
And injected this hated strain  
They cut the bloodline, they left it wanting  
Feeding on this youth's remains

But we go

Give me the life - give me your love  
Give me your innocence - give me the blood  
Give me your life - give me your love  
Give me your innocence - give me the blood  
Give me the blood  
Give me the blood

They take away...the very breath...to see it here and  
make it hurt  
They want to feel this inside out...when all of you have

hope to doubt  
They want to try it in this soul...to drink it free and cut it  
whole  
A sacrifice you will not give...you must not try...you will  
not live  
Lighting whole...the light inside...you want to find the  
very high...  
Bloodline

Give me the life - give me your love  
Give me your innocence - give me the blood  
Give me your life - give me your love  
Give me your innocence - give me the blood  
Give me the blood  
Give me the blood

They try this fight...to make it free and dance inside  
this entropy  
They view the cut...they fight the run to break it and fall  
there undone...  
They're looking hard...the final dead...another face  
they cut it red...  
They want to fight...they want to see...to capture you...  
For eternity...  
For eternity...
