You never give yourself completely
Its just that youve been hurt before
Youre so afraid to let me love you
You never leave an open door
Dont judge me by some other lover
Who broke your heart and walked away
Come lets be fair with one another
My world is yours I swear it
Say the word and we can share it

Chorus:

Dont hide your love
(dont hide your love)
Not if you care for me
(not if you care for me)
It isnt fair for me
To worry and wonder and wait
Dont hide your love
(dont hide your love)
Just love me here and now
(just love me here and now)
Well work it out somehow
Dont you keep us apart
Baby unlock your heart
Dont hide your love

Well I now the past has bought you sorrow
The clouds still hang around today
But dont let the rain, fall on tomorrow
Baby we can make it together
cause Im gonna love you forever

Chorus
