"Feelings"

Visit "[Feelings](#)" on MotoLyrics.com

I lie awake in sleepless wonder I can hear
A city rising on its way to a record year
Coffee and traffic lights they all will set the tone
Houses grow together they all would rather
Be alone

Feelings let us know we're alive
Will all be left behind
Let us know will we ever
Feelings let us know we're alive
Let us know will we ever reach the sky

I walk along the crowded street stare at the ground
I sit in silence on the train no one makes a sound
No one cares no one will stop to say hello
Locked in newspapers become prison cells
Prison cells

Touch the sky

All I know if this doesn't change
The problem remains and we keep
On on the same way alone and afraid
Of what others may say of us well
We'll just self-destruct
