Looks like the roar of the ocean  
And sure like the wind went in  
And so like the shape of the little break  
But to me all the stuff repels

Feeling the rock is rolling  
And the lava that you know you can't stop  
Get out of the way don't you hear what I say?  
The earth's gonna soon blow astop!

Chorus:  
Volcan----o  
The earth is clearing its road  
Volcan----o  
Life is going the extreme road  
You better run don't just stand there and gag  
This is one hot, hot rock  
I love the steam and the red shirt  
And the way that the earth turns gruesome  
And the forces too great, it's all if you take  
Hey watch out there she goes

Just like the ride by the river  
It knows how to light up the night  
The lava will flow and you better go  
As fast as chickens' flight.

Chorus

Bubbles and gurgles and oozes all day  
It goes where it wants who will stand in its way  
Yuu never should laugh and please never mock  
Because this is one mean nasty rock

Chorus
