I can't sleep now, no, not like I used to  
I can't breathe in and out like I need to  
It's breaking ice... now, to make any movement  
What's your vice? you know that mine's the illusion  
And all at once (as I'm trying) I can help you out (   
Just to keep things right)  
I'll be what you need (I kill myself to make  
Everything perfect for ya)  
Goodbye apathy, so long apathy

[Chorus]

So don't sit still, don't you move away from here  
So goodbye apathy (as I'm trying), so long fancy free  
(Just to keep things right)  
Goodbye apathy, (kill myself to make everything  
Perfect for ya)  
I don't wanna be you

I don't walk right, not like I used to  
There's a jump in my step as I rush to see you  
I could be happy here as long as you're near to me  
As long as you're close to me  
Now that I'm alright (as I'm trying) I can help you  
Out ( just to keep things right)  
I'll be what you need (I kill myself to make  
Everything perfect for ya)  
Goodbye apathy, goodbye apathy

[Chorus]

So don't you stop pushing me, I can take so much  
So goodbye apathy (as I'm trying), so long fancy free  
(Just to keep things right)  
Goodbye apathy, (kill myself to make everything  
Perfect for ya)  
I don't wanna be... you...

Everybody is watching you, everybody is watching me  
Too...
