I saw your face, stuck in a crowd
Silently screaming out loud
I felt the beat echo your heart
Throw me a line cuz it's to far

All that you want, all that you see
All that you thought you believe
Is it enough? Do you think it's to much?
All you gotta do I s reach out for it

All that you want is standing right in front of you
All that you need is love... (x2)

Up to the ledge, put out my hands
Get to the bones of where I'd land
Trade in my fears, trade in my thoughts
They disappear behind your walls

All that I want, all that I need
All that I thought I believed
Was it enough? Sure not to much?
Now you're the only thing I can trust

All that you want is standing right in front of you
All that you need is love... (x2)

(Instrumental)

It's all for you
It's all for you

(Piano)
