Come, come, my dear  
Take flight, come near  
I see your fear creeping around you  
First love, then hate, then love, no, wait  
Your confusion, it's gonna kill me  
I broke for you, I woke for you  
You taught me through, God love you,  
I see the signs are out of line  
No fault of mine  
Except for don't say his name now

I'm breaking out, something ain't right here  
You're falling out something ain't here

The scream, I burn  
What's that, you say  
Your cloud it's telling you lies now  
You hear my voice,  
You make some noise  
You stole my choice  
It's over now  
Pray for him now  
I speak to you

I'm breaking out, something ain't right here  
You're falling out, something ain't right here  
I'm breaking out, something ain't right here  
You're falling out, falling out from, falling out, you're  
falling out  
Why can't you see it?

Ooooooooooh

I'll pray for you now  
I'm speaking to you
