Pazuzu - Lord of all fevers and plague  
Bursting through - our intestines and souls  
Our doom - by plague and hatred you're spawned  
From Anu - almighty demon lord  
Gaping jaws - behind your festering breath  
Howl in pain - four-winged dark angel ascend  
Pestilence - master lord of disease  
Bringer of suffering  
Blackest son - your pain eternal  
Graceless one - enriched with anger and hate  
Foul king - demon god of the sick  
Lurk in darkness!
