You want it all but don't care what you want  
Feel complete, uh it's good  
You sleep by my side, it's understood  
It's not too late you wanted it good

Through the hosiery  
To the armory  
To the nothing  
How do you feel when you can't feel nothing?

Feel so good, You said it before  
To your feet, you fall to the floor  
Deep inside you still want more  
Deal or not, you look to the door

Through the hosiery  
To the armory  
To the nothing  
How do you feel when you can't feel nothing?

You can't get, you're waiting for me  
You put it in, You need discipline  
Cover my head, but you can't beat nothing  
Blood on my hands, you can wait on something

Through the hosiery  
To the armory  
To the nothing  
How do you feel when you can't feel nothing?

Drink some more, feeling opened up  
We're holding it in, now look what you've done  
One more go, you can't hold it back  
Drink some more, get it off your back

You can't get, you're waiting for me  
You put it in, You need discipline  
Cover my head, but you can't beat nothing  
Blood on my hands, you can wait...
