(Levi Oliver, Jeremy Kennedy)

Well it's no wonder, she's been feelin' cold
and it's no wonder, her stories gone untold

[Pre-Chorus]

cause everytime I look
into her eyes

I can see myself

staring back

and if you want to believe
then believe

I remember when, we used to agree
for what its worth, you meant too much to me

all you did was take

my pride away

and if I want it back

she said

come back yesterday

I've got news for you

[Bridge]

you know it's over now

I've got a life to live

you where wrong

I was right

I'm just sorry you found out

[Pre-Chorus]
