Chorus:

Precious moments when it's just we two
At our secret hideaway
Telling secrets just talking to You
I love to meet you everyday
At our secret hideaway

Even those who love me most
Don't know me like you do
My darkest fears my highest hopes
I can tell them all to you
When trouble comes like a rainy day
I run to our secret hideaway and listen
You tell me what to do

[Chorus]

At times I fail I feel so low
And think could you still care
My guilt becomes a heavy load
It's far too much for me to bear
The accuser comes tries to block my way
I run to our secret hideaway You'll listen
And forgive me when I've failed

[Chorus]

Bridge:

A secret place that no one else can find
A place that's safe where I can leave the storm behind
A place of peace to ease my troubled mind
A place where I can feel your heart as you touch mine
