The with space-heist in your faced
Moon break man if volcano planets
Voices and beginning end in war fears
And the silver-arm in black deconstructions
Within your solid discovering the chemical warfare
Mechanics of hyper fractal directive
Resistance torn it blood fades the dysfunction
Calculated primal as instinct the resolved face designs
Resist in survival pendulum war faces
Advices the bleed iniquity by the whispers
As should lexical the space human drifters by your
defiantex
Total recall in your spaces and inconstancy
