They said you were very nice
But I didn't see you, by the way
This wasn't what I was expecting
But it saves time

They said you were very nice
But I didn't see you, by the way
And if I don't then the faults old

And if you don't believe
Then you'll never be
And if you won't believe
Then you'll never be

That's how he gets what he wants
That's why he is where he is now, tonight
Underneath a thousand lights
With a total of a trillion watts
