Everyone was there when you
Stood behind my back and
Broke it, by the way.
So now I'm building up this mound
Of all the old and all the records
Now, I'm gonna burn it with your name

(Chorus)

Come one day, I'm gonna make you feel this
But I'm dealing with it, NOW!
Before I die, I wanna see fear on your face
But I'm dealing with it now.

And still you went away
And that you can't deny
Like the color of my skin.
I never took the time
To look you in your wicked eye
Before you broke me, by the way

(Chorus)

You better think before you engage
You better just walk away (You gotta deal with it) x4

(Chorus)

But I'm dealing with it now
But I'm dealing
Still I'm dealing with it now

Deal With It x3
