Yet another day seems like it's wasted
You don't feel your any closer to the prize
A dead end job where there's no future
Praying that tomorrow, things won't be this way

[Chorus]

Things will get better this I promise you
And I know that you won't feel this way forever
Things will get better this I promise you
And I know, loneliness won't last forever

Yet another day, another tired morning
You're catching up to your intentions
You're thinking, life has to be easier than this
Maybe tomorrow things won't be this way

[Chorus]

[Chorus]

Loneliness won't last forever
I promise, with all that's in me
To leave this emptiness behind.

[Chorus]
