"Over The Sky / Stone Land"

Visit "[Over The Sky / Stone Land](#)" on MotoLyrics.com

Another day like the same old days
From my window I watch the crowd
Walking machines with their distant eyes

Hypnotized they're not really there
With their thoughts they can't see around
Hearts of stone trapped in their minds

Future worrying
A past left behind
Unknown present
And life goes passing by

[Chorus:]
Stone land
We've been living in a Stone land
But there's another chance
It's time for us to build this world again

People living with big city's lies
Empty bodies filled with loneliness
And their souls lost in the sands of time

Future worrying
A past left behind
Unknown present
And life goes passing by

[Chorus]
Stone land
Let's break the chains
It's our time it's our chance
Let's all join our hands
And change this world into a promised land

[Chorus]
