"Powerwish"

Mainspring, energy, pushing us all
Strong impulse leading us to survival laws

We wish to kill and live
We make big wars and build solid ideologies
We subjugate, and we desecrate
We deny our culture for a major force inside

[Chorus:]
We destroy and create
(For powerwish)
We command and we enslave
(For powerwish)
And we can't tear it down
We corrupt and we smile
(For powerwish)
Now we live and we die
(For powerwish)
And we won't stop it now

Strange battle, with no start, no end
Sometimes amusing, sometimes innate to men

We wish to bleed and breathe
We rise and fall
Fighting a well-known enemy
We alienate, and we procreate
We feed the cursed for a
Major force inside

[Chorus]
