To talk 'bout the pleasures of life  
It's easier than to face reality  
While thousands are dying of hunger  
A few people eat until they get sick

The church teaches me how to love  
One love they can't give us  
The nation teaches me how to wait  
For a future that always seems to fade  
At school they force me to learn  
Silly things that don't matter to me

The system has to go on  
The truth may not appear  
The poor will remain poor  
In a society reigned by fools

Open your eyes to the world  
Life is more than we can see  
We can change the future  
'Cause it is in our hands  
You only have to want  
There is much more to see  
You only have to think  
And together rise again  
Start again  
The power of life  
To win  
Changing everything  
You only have to believe  
That we have the power
