"Winds Of Change"

Visit "[Winds Of Change](#)" on MotoLyrics.com

From western blue skies
Came this morning breeze
A whisper of the new age
Bringing waves of peace
In this warm dawn we awake
We're children
Of the new earth
Another gone century
Another brave new world

We are changing deep inside
Feeling freedom by our side

[Chorus:]
And winds of change
Came through the night
Into the day
Into a brighter time
And years of change
Are passing by
A better place to live for you and I

The red bear has awaken
From a long an' silent sleep
Leading a revolution
Through the cold an' lonely east
No shameful walls around us
No more forgotten lands
The chains are being broken
No white shackles on black hands

So many roads so many miles
Simply to claim our human rights

[Chorus]
