Children the war

They live to fight

Patrolling the streets

Ready to strike

Defending their countries

With blood and pride

Attacking the troops

Learning to survive

[Chorus:]

They're children they're warriors

Dreaming of peace, no fear of death

A painful deep mark lives in their hearts

Made by this war they'll never forget

They're victims of men that for a long time

Just wanted to kill

If men love war - fuck them all

But don't let' em die for another war

As they're children

Love is in their minds

But they'll never know

The reason for all this fight

Living at a foolish war

Air is full of death

Shooting and killing

'Til their last breath

[Chorus]

Oh god of this earth

Show them just one place

A place that' they could live

With peace n' no more hate

And all this foolish war

Won't be finished

Evermore

And so many kids

To fight will be born

We are killing each other

Time keeps passing by

(Who knows) peace can rule one day

And take all the pain away

No, there won't be

One sole hope

We've done it all again

No future for men!
