

Overdose "Loneliness / Let Us Fly"

Visit "[Loneliness / Let Us Fly](#)" on [MotoLyrics.com](#)

When I look at those shining stars
I still remember of my childhood time
For years I've been waiting for you

Why can't you hear me I just need a sign

I wish that together we could fly
And soon find our lost green sky

When the sun used to shine
And green was all in sight
We started killing the tress
And the air we breathed

Future was so clear to see
But nobody wanted to believe
Mother nature gave us what we needed
And we sold her love for an ambitious dream

[Chorus:]
Let us fly through the stars
Looking for green skies

Flying high a new life we'll find
You and me wild and free
In perfect harmony
With peace we'll live eternally
Spread your wings on me then we can fly away
I'm waiting here for you, someday

I turned my face looking for a sign
But I saw good men being killed for their minds
So simple and true they were fighting for life
Now I'm sure they've found their lost green skies

[Chorus]
