

Overdream

"First Step"

Visit "[First Step](#)" on MotoLyrics.com

Wonder and raise up your head

Set your eyes far on the sky

Hold your breath, fold tight your hands

Let your dreams with us to fly

Blue Globe

My home

Now a faint memory

Will we

See again

Sunbeams play in the sea

One step ahead

Will move each man

One step away

A new era wakes

Send your hopes out in the night

Through the cold, the endless miles

Stars around watch as we float

Stay with us, lead our way home
