Enter life between
Enter life between
And you will find
People that surround you
They will kill you
Hold on to your weapon
Kill them if you see them
They take life
To destroy your power
They hope
That you will die
They hope
That you will stand aside
I created this land
And you will not
Take this away
Terror in this place
Together we will hunt you down
Now you will die
For ever feel my eternal hate
Enter life between
Enter life to kill
Kill for my needs
And I will rise again
My mind is computerized
And stronger than yours
The race is no longer...
This place is no longer safe
Electronic failure
You cause your enemy
Pain is so real
This war shall always be...
Enter life between
Enter life to I'll
Kill for my needs
And I will rise again
My power is now real
My hate is now
Destroying your life
Destroy!
