It gets cold the moment you close your eyes and so
terribly dark
It gets cold the moment I feel your pulse with no blood
in your heart
Dream when you drift of tonight and followed me home
It gets cold the moment you see the light with no love in
your heart

Ohohoh everynight I can feel ohohoh you when I'm lost
and alone
Ohohoh everynight I can feel you ... ohohoh everynight
Lift your voice and sing to the deep sky , hold me close
and don't let me go , spread your tiny wings cuz you're
flying high
Ohohoh I swear you make me feel alive
You make me feel alive

It gets real the moment you lose your grip and life
tears you appart
It gets real the moment you see the light with no love in
your heart
Dream when you drift of tonight and followed me home

Ohohoh everynight I can feel ohohoh you when I'm lost
and alone
Ohohoh everynight I can feel you ... ohohoh everynight
Lift your voice and sing to the deep sky , hold me close
and don't let me go , spread your tiny wings cuz you're
flying high
Ohohoh I swear you make me feel alive
You make me feel alive

Ohohoh everynight I can feel ohohoh you when I'm lost
and alone
Ohohoh everynight I can feel you ... ohohoh everynight
Lift your voice and sing to the deep sky , hold me close
and don't let me go , spread your tiny wings cuz you're
flying high
Ohohoh I swear you make me feel alive (x3)
You make me feel alive (x2)
