I love the way look and put your ass out i wanna fuck

about leaving this world one

from the lady in the
liquar store who keeps forgiven so com home maybe in
time you'll understand
only guns can save us as we pass by the band now
think of all the people we new
in our passed who passed on they in heaven found
peace at last piture a place
that they exist together there has to be a place better
than this in heaven so
right before i pass dear god what iam askin remember
