I have this fantasy if you and me together  
In a world, where love exists

You have this way of making me feel special  
Every time the world pounds down on me

CHORUS:  
Never hurt you  
Never leave you  
Never ever make you cry  
Until I die

I never knew what life meant  
In this big old crazy world  
Until I met you

You would vanish all my sufferings and misery  
Can't imagine life without you

CHORUS 2x

I have this fantasy if you and me together  
In a world, where love exists

You have this way of making me feel special  
Every time the world pounds down on me

CHORUS 2x
