The pest, it came from the dead  
Ridding the lands of life  
The pest, it was the savior  
Cleansing away the rot

Fields covered with death  
Incubators of disease  
Spawning the sickness supreme  
Carried by the breeze

Punishment through defeat  
Humanity forced to forever bleed

The hand of the dying god  
Came to make us aware  
The hand of utter doom  
Took away all our lives

Viral defeat by air  
Against which none can defend  
Reaping lives by the wind  
A breath of death and the end
