Darlin' was a hit, started throwing punches  
She connects, never gets what she wants and she  
wants

She's unhinged, swears now that was then  
Just a little glitch, patch it up again  
And she wants and she wants and she wants

So far I don't understand this, there's no  
misunderstanding  
There's nothing here to get, she wants more than my  
attention  
She's not above invention but I don't really care

It's unreal, she'll tell you what you wanna hear  
Feel her infection touch you and rot  
And you rot and you rot and you rot

So far I don't understand this, there's no  
misunderstanding  
There's nothing here to get, she wants more than my  
attention  
She's not above intention but I don't really care

Don't know what you want or how far  
You fall when you're unhinged  
Coming back for more, I was only horny

So far I don't understand this, there's no  
misunderstanding  
There's nothing here to get, she wants more than my  
attention  
She's not above invention but I don't really care
