Save brain cells, multiply brain cells

Look up the sky among the bristling skyscrapers  
Dark night sky with no twinkles  
Breathe the smog of industrial waste  
Let's get high together

Save brain cells, multiply brain cells

In the center of unlimited desires  
People get lost, tears of the sea  
Close your eyes and listen  
You can hear the sound of collapse  
The devolution of human lives

Multiply brain cells, multiply offset business  
Multiply brain cells, multiply offset business  
Save brain cells, multiply offset business  
Save brain cells, multiply offset business

Human beings have gone too far  
Where are we going? It's not the matter  
Evolution or degeneration  
We will lose something important again

The primates, human beings, the summit operations  
Rapid growth, survival of the fittest  
A food chain, a symbiotic relation  
Natural selection, on the verge of collapse
